Prices. The prices given in this list, we believe, represent a fair value for such high grade stock as we always endeavor to supply.

#### CONDITIONS OF SALE

Terms. Cash with order or satisfactory references from strangers.

Postage stamps will be found a convenient method of remitting for small amounts and can be used by us to advantage.

When goods are to be shipped via Parcels Post, please add cost for postage.

### A DISCOUNT OF 5 PER CENT IS ALLOWED WHEN CASH ACCOMPANIES ORDER.

Note. At the prices given in this list we will guarantee to furnish strictly first-class stock of the size and ages named, but as our prices are low, and as it is impossible for us to guarantee the life of a plant after it leaves our hands, we cannot replace free any stock which may fail to grow. If a guarantee for one year is desired, add 20 per cent to the list price.

We give no warranty expressed or implied as to description, quality, productiveness or any other matter of any Nursery Stock, Bulbs or Plants we sell. No complaints will be considered that are not made within five days after receipt of stock.

### THE NEW ENGLAND NURSERIES CO. Bedford, Mass.

Time for Planting. All hardy trees and plants of any description can be safely transplanted in the Spring as soon as frost leaves the ground, and usually as late as about June 1st. Also during the period beginning September 15th and continuing until the ground becomes frozen. Evergreen trees and shrubs can further be safely handled during August.

While we give our best efforts to produce and furnish high grade trees and plants, and do not attempt to pose as landscape architects, we are always happy to give such assistance as we can to customers in making the proper selection of what to plant, and advice as to the care of plants, and we respectfully invite correspondence pertaining to problems of interest to planters.

Pruning. In order to encourage a healthy growth, and also to assist plants in becoming re-established, all deciduous stock should be pruned back at once after being transplanted. Roses should be cut back to within 4 to 5 inches of the ground. From deciduous trees and shrubs, one-third to one-half of the growth from the previous summer should be removed. All cutting back, or pruning, should be done immediately after plants have been set.

The sizes of trees and shrubs named in the following pages are such as are usually preferred by planters. If desired we can generally supply larger or smaller sizes and will always quote prices on application.

All stock selected and marked by customer at the Nursery will be charged for in accordance with its value. Prices in this list will not govern such stock.

It is our desire that all stock purchased of us shall give the best of satisfaction and our interest does not cease when goods are shipped or payments collected. We ask that all will feel free in calling or writing us pertaining to any assistance we can give, —not only before an order is given, but afterwards as well.

Facilities are maintained for supplying plans and estimates for all kinds of landscape work.

Location of our Nurseries. Located 15 miles from Boston, 12 miles from Lowell, 3 miles from Concord, and 5 miles from Lexington, our Nurseries can be reached via Boston & Maine trains from the North Station, Boston, or via electric cars from Arlington Heights. The cars connecting Arlington Heights and Concord pass directly through our property.

Visitors are always cordially welcome, but we ask the indulgence of parties calling during our busy Spring and Fall months, when it is quite impossible for us to devote as much time as we should wish in showing our Nurseries. The most courteous treatment possible, however, will always be given to those who favor us by calling.

The stock offered in this list is, we believe, absolutely free from all injurious insects or diseases, and all shipments are accompanied by CERTIFICATE OF INSPECTION, both State and Federal.

# Hardy Evergreen Shrubs, Plants and Vines

Evergreen shrubs, like Evergreen Trees, transplant well in the Spring as soon as the ground is open, and generally as late as June 1st. Also during the period beginning August 1st, and continuing until the ground becomes frozen.

### Reliably Hardy Roses

Cultural Directions

Planting. Dormant plants may be set out during April and May, or in October and November. The plants should be inserted into the ground

#### RELIABLY HARDY ROSES (continued)

so deeply that the collar is at least four inches below the surface, and after carefully spreading the roots, the soil should be firmly compacted.

Watering and Mulching. At once after planting apply a thorough watering, and during a dry season, a mulch with strawy manure will

prove beneficial.

Pruning. All roses, even the Climbing varieties, should be severely prumed back at once after being planted, and regardless of the size of the plants, each shoot should be cut back to within from three to five buds or eyes from the ground. Failures of Roses to succeed after transplanting are generally due to disregard of rules pertaining to deep planting and close pruning.

HYBRID PERPETUAL ROSES Strong Field-Grown Plants

Price: Each, \$1.00. Dozen, \$10.00, except where otherwise noted. The following named Hybrid Perpetual Roses can be relied upon for hardiness. If planted in good soil, set in the ground to the proper depth, and pruned back as directed, they will produce quantities of bloom the first season. Deep planting and close pruning is very essential.

Alfred Colomb. Carmine Red; very large and full.

American Beauty. Deep Pink, shaded with Carmine.

Anne de Diesbach. Clear bright rose; large and fragrant.

Coquette des Alpes. Large, full and well-formed with very large petals.

Lovely pure white in color; fragrant; profuse bloomer; hardy. Fisher Holmes. Brilliant Carmine-crimson.

Frau Karl Druschkl. White. One of the best.

General Jacqueminot. Bright Scarlet crimson, Gloire de Lyonalsse. Pink tinted Yellow. John Hopper. Bright Rose, Carmine center.

Mme. Gabriel Luizet. Light Silvery Pink.

Mme. Plantler. Pure White, early Summer bloomer,
Magna Charta. Pink and Crimson. Very large, full and double.

Margaret Dickson. White, pale flesh-color.

Mrs. John Laing. Soft Pink; fragrant; blooms late in Autumn.

M. P. Wilder. Cherry Carmine.
Paul Neyron. Deep rose, very large.

Perle des Blanches. Pure White.

Persian Yellow. Bright Yellow.

Prince Camille de Rohan. Deep velvety crimson. Ulrich Brunner. Cherry-red. A fine Rose.

HYBRID TEA ROSES

The following list contains only the hardiest varieties. If given a slight protection in Winter, they can be successfully grown anywhere in New England.

Price: \$1.00 each. Dozen \$10.00, except where otherwise noted.

Caroline Testout. Large, double, clear Bright Rose.

Grus an Teplitz. Dark Red. Very free flowering and hardy.

Juliet. Old gold, shaded with deep rose.

K. A. Victoria. Delicate Creamy-white, free flowering; quite hardy. Killarney. Pink.

Killarney. White. Considered by many one of the best White garden Roses.

La France. Silvery-rose, changing to Pink. MOSS ROSES

Price: Each, \$1.00, Dozen, \$10.00

Crested Moss. Deep Pink, buds surrounded with mossy fringe and crest.

#### RELIABLY HARDY ROSES (continued)

#### CLIMBING AND RAMBLER ROSES

Plant very deeply, and regardless of length of branches, prune back at once after planting to within 5 or 6 inches of the ground.

15 best unnamed varieties of hardy Phlox. Price, \$2.00. (By mail, \$2,25.)

1 Plant each of 15 choice sorts, and of sizes to bloom the first season,

## Fruit Trees and Small Fruits

The varieties of fruit trees we offer below are such as can be particularly recommended and are best adapted to the climate of New England.

## FRUIT TREES AND SMALL FRUITS (continued)

Any variety desired and not listed, we can generally supply from our Geneva, N. Y., Nurseries.

Pruning-Apples, Pears, Cherries, and Plums should at once after planting be pruned back to some extent, and it is generally well to remove from one-half to two-thirds of each branch. This treatment will insure a strong and healthy growth, and materially assist trees in taking hold. Leading Orchardists now recommend the spacing of fruit trees in orchards as follows:

Standard Apples	25	ft.	apart
Dwarf Apples	8	ft.	66
Standard Pears	20	ft.	66
Sweet Cherries	20	ft.	66
Sour Cherries	15	ft.	66
Plums	15	ft.	66
	10	ft.	6.6
Peaches	15	ft.	4.6

## Number of Trees Required to an Acre

8	feet	apart	each	way			 									 680
10	feet	apart	each	way	 											 430
15	feet	apart	each	way						٠.						 200
20	feet	apart	each	way											 	 110
25	feet	apart	each	way											 	 70
				way												
40	feet	apart	each-	way		٠.		 								27

Note: Our fruit trees are, we believe,, as hardy and as well grown as it is possible to supply, and thousands of orchards throughout the country bear witness as to "New England Quality" trees.

We try to have our stock true to name, but as we are human, we may in spite of our best efforts make mistakes, and will always stand ready to replace free, any stock that proves not to be as represented.

It, however, is mutually agreed between all purchasers and ourselves, that we shall not be held liable for any value greater than that paid for the trees. The New England Nurseries Co.

## **Apples**

Standard Apples, 2 years. 5 to 7 feet high. Price, Except where otherwise noted. Each, \$1.50. Dozen, \$15.00 Per 100, \$90.00.

## FRUIT TREES AND SMALL FRUITS (continued)

### CHERRIES

2 years old. Each, \$1.75, Dozen, \$17.50.

## BIGARREAU OR SWEET CHERRIES

Black Tartarian. Vigorous growth; very large; purplish black; one of the best. Ripe Governor Wood. Ripening end of June.

Vigorous growth; medium; clear, light red; tender deli-

cious. Ripening end of June.

Napoleon. Vigorous growth; very large; pale yellow with red cheek. Firm, juicy and sweet; very good. Ripening first of July.

Windsor. Vigorous growth; large; liver colored; very firm, very good. A

valuable variety; hardy. Ripening end of July.

Yellow Spanish. Vigorous growth; large; pale yellow with red cheek; firm, juicy and delicious: very good. Ripening end of June.

## MORELLO OR SOUR CHERRIES

Early Richmond. Medium size; dark red; juicy, rich acid flavor. The stone adheres to the stem. One of the most valuable of Sour Cherries. Montmorency (Large Montmorency). A Cherry of the Richmond class, but larger and more solid. A more upright growth, equally hardy, and a heavy cropper. Ripens from seven to ten days later than the Richmond, entirely escaping danger from Spring frost,

## PRUNING OF CHERRY TREES

While all Fruit Trees should at once after transplanting be cut back to some extent, severe cutting back is particularly necessary in the case of Cherry trees, and especially with varieties of Sweet Cherries. trees are slow in becoming established, and all branches should be cut off to within four or five inches of the stem.

(2 years old. Each, \$1.50. Dozen. \$15.00.)

Bradshaw. A very large, oval, dark violet red; juicy, sweet and good; a valuable market variety.

Abundance (Bhotan). Beautiful lemon-yellow with bright cherry. been thoroughly tested, and is highly recommended. August.

Burbank. Large and beautiful, a clear cherry red, with a thin lilac bloom; flesh a deep yellow, very sweet, with a peculiar and very agreeable flavor. Ripens later than Abundance. Enr of August.

October Purple. Large, round fruit; dark, reddish purple yellow; flesh of

most superb quality. Ripens middle of September.
Wickson. Originated by Burbank. A sturdy, upright grower; fruit remarkably handsome, deep maroon red, covered with white bloom; excellent keeper and shipper.

## **PEACHES**

The peach tree requires a well-drained, moderately rich soil. Warm, sandy loam is probably the best. When the trees are first planted, all side branches should be cut back to within one-fourth to one-half inch of the main trunk, and the latter reduced one-third. The following listed varieties which are particularly recommended for the New England

climate we offer in No. 1 trees.

Price: Each, 75 cents. Dozen, \$7.50.

Belle of Georgia. Very large skin white with red cheek; flesh white, firm, and of excellent flavor; fruit uniformly large and showy; free, Very hardy and one of the latest to ripen.

## FRUIT TREES AND SMALL FRUITS (continued)

Carman. A new, hardy, rot-proof Peach. Large, round; pale yellow skin and red blush on sunny side; white flesh, sweet flavor.

Champion. New. Handsome creamy white, with red cheek. It is of large size and of very superior flavor. Ripens about August 1, and has shown that it bears improvement over other white sorts.

Crawford's Early. Very large; yellow; juicy, melting; freestone. Ripening

early September.

Crawford's Late. Very large; yellow; juicy; good; freestone. Ripening end

of September.

Elberta. An exceedingly large, light-colored yellow Peach, a cross between Crawford's and Chinese Cling; juicy, well flavored; said to be probably the finest yellow freestone in existence; planted in enormous quantities in the Peach growing regions of the South. Ripens early in August.

Fitzgerald. A chance seedling, found in Ontario, outside of the Peach belt, where it has produced regular crops. The fruit is of very large size, pit very small. This promising new peach is of the Crawford type, but excels that famous variety in size. hardiness and productiveness. Season same as Early Crawford.

Greensboro. The largest and most beautiful colored of all the early Peaches. Of good quality; juicy, freestone, but adheres slightly; ripens perfectly to the seed, and with the Alexander.

## QUINCES

First-class. 2 years old. Each, \$1.50. Dozen, \$15.00.

Ohampion. The fruit is very large, young trees, two years from the bud are often loaded with fruit. Its season is about two weeks later than the Orange.

Orange. Large, roundish, bright golden yellow; cooks quite tender, and is of very excellent flavor. October.

Our Fruit trees being grown under the most severe climatic conditions, can be particularly recommended for hardiness. Each Dozen 100

English Filbert or Hazel. 5.00 Strong bushes, 2 to 3 feet.... .50

# Hardy Native Grapes

Each, 50 cents. Dozen, \$5.00. Per 100, \$30.00.

Concord. Bunch and berry large, round, black, thickly covered with a beautiful bloom; flesh moderately juicy, sweet pulp, quite tender when fully ripe.

Moore's Early. Bunch and berry large, with a blue bloom; quality better than Concord; its size and earliness render it desirable.

Worden. Bunches large, handsome; berries sweet. Ten days earlier than Concord and superior to it in flavor; ripens well and in cold localities.

## FRUIT TREES AND SMALL FRUITS (continued)

## Red and Reddish Purple

**Brighton.** Large, handsome and of the best quality, and ripens early.

Catawba. Well-known; highly flavored, but late.

Delaware. Medium or small, but delicious; highly

esteemed everywhere.

## White

Green Mountain. One of the very best; ripens early; good bearer; free from mildew; vigorous grower.

Niagara. Bunch medium to large; berry large; skin thin but tough; slightly pulpy, tender, sweet, vine vigorous, healthy, and very productive; ripens with Concord. All things considered, probably the most valuable white Grape in cultivation.

## **Small Fruits**

## BLACKBERRIES

Strong plants: Dozen, \$1.50. 100, \$6.00.

Erie. Fruit very large, excellent quality. There is no berry that rivals it in combining hardiness, large size, earliness and productiveness.

Snyder. A marvel for productiveness; fruit medium size, sweet and melting to the core; extremely hardy.

## RASPBERRIES

Price, except where noted, dozen, \$1.50. 100, \$6.00.

- Cuthbert. (Queen of the Market). Large dark crimson berries of firm texture, sprightly acid and of excellent quality; a certain cropper, always to be recommended.
- St. Regis Everbearing. (New) Red; berries of large size and of a bright crimson color; flavor very sweet and rich; excellent quality. Highly productive and very hardy. Producing abundantly throughout the entire Summer.

Probably the best of all varieties for garden culture.

## CURRANTS

Note: Government embargo prevents shipment of Currant or Gooseberries to points outside of Massachusetts or to the following designated localities in Massachusetts, Athol, Barre, Dana, Duxbury, Halifax, Hanover, Hanson, Ipswich, Lee, Lenox, Marshfield, Newburyport, North Andover, Orange Pembroke, Petersham, Phillipston, Stockbridge, Topsfield and Warwick. It is requested that Black Currants shall not be planted anywhere in Massachusetts.

We offer the following Currants in healthy stock.

Cherry. Fruit of the largest size; deep red, rather acid; short bunches; growth strong, stout, erect; short jointed shoots. Each, 35 cents. Dozen, \$3.50. Per 100, \$430.00.

## SMALL FRUITS (continued)

Fay's Prolific. Fruit very large bright red and of excellent flavor; less acid than the Cherry. It has a long stem which admits of rapid picking and is enormously productive. Each, 35 cents. Dozen, \$3.50.

Perfection. The color is a beautiful bright red, size as large or larger than Fay's; the clusters averaging longer. The quality is rich, mild, subacid, plenty of pulp, with a few seeds. Each, 35 cents. Dozen, \$3.50.

## GOOSEBERRIES (See note under Currants)

Price: 50 cents each.

Downing. Whitish green, vigorous and prolific; juicy and good. A fine, reliable berry for general culture.

Houghton. Vigorous and slender grower. Its medium pale red berries are plentiful and good, and it can be depended upon.

Pearl. The most prolific Gooseberry known.

## **ASPARAGUS**

Glant Rust-Proof. (Best of all.)
2 years. Per 100, \$2.00; per 1000, \$15.00
1 year. Per 100, 1.00; per 1000, 8.00

### RHUBARB

Champagne. A choice new English variety.

Two years old, each, 50 cents; dozen, \$5.00.

Linaeus (Myatt's). Large early and of good quality.

Two years old, each, 25 cents; dozen, \$2.50.

## TO OUR CUSTOMERS

## A Word About QUALITY

THE best tree or plant is not necessarily the one which, when it is received by the planter, is the largest or most rugged in appearance, but rather one which has been produced under the most severe climatic conditions. Such trees and plants are ours. Our nurseries are located in one of the coldest sections of New England, and while it requires more time, and is connected with more difficulty to produce nurserystock here than in warmer climates, we can confidently say, that the stock which we produce, is without question as hardy as can be obtained, and such as will give lasting satisfaction to the planter. A tree or plant produced in Bedford, should not only live, but it should thrive wherever it is planted.

As it is our desire to give service, we respectfully invite correspondence pertaining to any problem of interest to planters; as for example, to the best selection of what to plant, care of plants, or arrangement of stock in order to obtain the best effect, etc. Whenever we can be of service, please feel free to call on us.
